Going forward with quality and rigour

The new edition of the Bages University Foundation Annual Report sets out the main activities of the 2019-2020 academic year as well as the initiatives, data and most notable results which have been achieved by this institution. This collection highlights the most relevant areas of teaching, research, transfer and activities that have comprised the university life of our students.

The FUB is an institution of which we are proud, and which continues in a leading position that is determined, once again, by the quality of its teaching and the prestige it has earned. Its results are the result of the hard work and rigour of the entire university community and this is what we want to emphasise in this document, which we invite you to read below.

We cannot ignore the fact that this has been an atypical end of the year, probably the most different one which we can remember, due to the Covid-19, a pandemic with overreaching repercussions in all areas of life. The FUB has not been unaware of this serious situation. However, despite the uncertainties I am convinced that we will prevail and, from our position of responsibility, we will spare no efforts in order to continue moving forward, overcoming the challenges in our path with the aim of offering the best service to society and the progress of our city and our country.

Marc Aloy i Guàrdia
Mayor of Manresa

Commitment, innovation, responsibility

Loyalty to the commitment of putting knowledge at the service of the well-being of people and the development of the territory has guided our action throughout the 2019-2020 academic year, an uncertain, complex and changing year which has been like few others.

The expansion of CISARC, the Centre for Innovation in Simulation, and the creation of the Chair of Simulation and Patient Safety have consolidated our commitment to this methodology, which provides a distinctive feature to both training and research. It is a commitment included in the new pedagogical model, which opts for an academic proposal of face-to-face learning based on reflective, experiential and practical aspects while at the same time transmitting the values of professionalism, humanism, commitment and scientific rigour.

The concept of social responsibility has taken on a new dimension as a result of the health emergency. Bringing our leadership capacity, qualified staff and healthcare resources to those of other institutions has been the committed response of the Bages University Foundation in a context that has demanded the very best of each one of us. No other option would have been conceivable.
